

Forestry Intern

The Tennessee Department of Agriculture Division of Forestry is seeking an intern to assist program managers and other forestry staff in the building, execution, and completion of specific projects. Projects will be assigned based on the interns' interests and needs of the Division at the time. Projects include:

Process Improvement/Project Management

- Co-author personnel hiring manual
- Assist in writing the statewide 2020 Forest Action Plan
- Write position descriptions of division staff
- Map process cycles and timelines (budget, purchasing)
- Create onboarding process

Rural Forest Management

- Assist in field visits to conduct annual monitoring of Forest Legacy Conservation Easements
- Build ESRI ArcGIS Online Story Maps

Forest Health

- Assist in gypsy moth trapping program (supplies, binders, install, quality control)
- Build ESRI ArcGIS Online Story Maps

Cost Share

- Assist in creating marketing materials for new condensed cost share program & vendor service programs
- Build ESRI ArcGIS Online Story Maps

Urban Watersheds

- Assist in conducting riparian/invasive plant restoration projects
- Build ESRI ArcGIS Online Story Maps

State Forests

- Assist state forest continuous forest inventory projects
- Assist in compartment planning

Location:

Nashville, TN

Education:

Pursuit of Bachelor's degree in forestry or related natural resource management field is preferred but not required. Must have or be able to obtain a driver license and have a driving record that meets agency requirements.

Comments:

Some work may occur after hours and require out of town travel.

Working Conditions:

Office with some field work.
